

SCIENCE TEACHER SABBATICALS

The Pennsylvania State University

With support from the Boeing Corporation, Penn State is awarding \$20K half-year sabbatical fellowships for urban science teachers to work with scientists and engineers on cutting-edge science and engineering.

RECHARGE YOUR BATTERIES

Learn new content and scientific skills by working with a research team in fields like astronomy, oceanography, or nanotechnology.

BUILD NETWORKS

Meet other teachers and science professionals and plug into science outreach projects and resources.

CHOOSE YOUR HOME BASE

Depending on their project, you can be based at University Park or a number of other campuses and research sites.

U.Ed. EDU 07-09

Half-year sabbaticals can begin as soon as January 2007.
