

| Grade 10 |
|---|
| Math Standards |
| CC.2.3.HS.A.13 Analyze relationships between two-dimensional and three-dimensional objects. |
| CC.2.3.HS.A.14 Apply geometric concepts to model and solve real world problems. |
| English Language Arts Standards |
| CC.3.5.9-10G. Translate quantitative or technical information expressed in words in a text into visual form and translate information expressed visually or mathematically into words. |
| CC.3.5.9-10J. By the end of grade 10, read and comprehend science/technical texts in the grades 9-10 text complexity band independently and proficiently. |
| CC.3.6.9-10.F. Conduct short as well as more sustained research projects to answer a question or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation. |
| CC.3.6.9-10.G. Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and following a standard format for citation. |
| CC.3.6.9-10.H. Draw evidence from informational texts to support analysis, reflection, and research. |
| Science Technology and Engineering Standards |
| BIO.A.2.1.1 Describe how biological macromolecules form from monomers. |
| BIO.A.2.2.3 Compare the structure and function of carbohydrates, lipids, proteins and nucleic acids in organisms. |
| BIO.A.2.3.1 Describe the role of an enzyme as a catalyst in regulating a specific biochemical reaction. |
| BIO.A.3.2.2 Describe the role of ATP in biochemical reactions. |
| BIO.A.4.1.2 Compare the mechanisms that transport materials across the plasma membrane (i.e., passive transport – diffusion, osmosis, facilitated diffusion; and active transport – pumps, endocytosis, exocytosis) |
| BIO.A.4.1.3 Describe how membrane-bound cellular organelles (e.g., endoplasmic reticulum, Golgi apparatus) facilitate the transport of materials within a cell. |
| BIO.A.4.2.1 Explain how organisms maintain homeostasis (e.g., thermoregulation, water regulation, oxygen regulation). |
| BIO.B.2.2.2 Describe the role of ribosomes, endoplasmic reticulum, Golgi apparatus, and the nucleus in the production of specific types of proteins. |
| BIO.B.2.3.1 Describe how genetic mutations alter the DNA sequence and may or may not affect phenotype (e.g., silent, nonsense, frame-shift). |
| BIO.B.2.4.1 Explain how genetic engineering has impacted the fields of medicine, forensics, and agriculture (e.g., selective breeding, gene splicing, cloning, genetically modified organisms, gene therapy). |
